- PVC-frei

SUSTAINABILITY CREATES GOOD KARMA

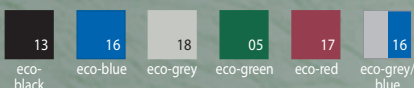

As one of the first ecologically oriented product series, launched in 2006 - KARMA stands more than ever for a forward-looking, responsible approach in the area of office organization. For the HAN KARMA programme, post-consumer materials (plastics from recycled products) are used.

NEW: The successful Eco-Line KARMA is extended by two new colours – eco-green and eco-red. These have also received the environmental certificate „Blauer Engel“. Sustainability is as colourful and diverse as our new colour choices.

We turn the word „environmental protection“ into practice:

- Ecologically sophisticated products made from recycled materials
- Consumption and energy-saving technologies at our location in Germany
- Shortest logistics routes
- Efficient, resource-saving packaging concepts
- Sustainable procurement guidelines
